THULEMA

Thulema creates 21st century furniture for 21st century offices and public spaces. We follow and pay forward the high level of quality we have set for ourselves both when working with our clients and when making assembling and installing our furniture.

METOD

Being and doing things together is more than just fun – it's also seriously efficient. Ideas are quickly picked up by the team and developed further at the speed of light. Everyone knows that inspiration creates an atmosphere where work gets done almost effortlessly.

The support of others and excellent conditions can often go unnoticed – people only notice the shared goal and the shared space. However, many businesses have understood the power of teamwork and are modelling their working environments after busy market spaces. We have created our Metod range with one goal in mind: to help people work more efficiently and achieve their goals together.

A handwritten signature in black ink, consisting of stylized, overlapping letters that appear to read 'MPÄRN'.

OPEN SPACE

Metod is created to meet the needs of a modern open office: to design a space where you can interact naturally, quickly and freely. The Metod range does not consist of desks and chairs for only a single person, but lets you form practical combinations for several workstations.

TEAMWORK

Created for businesses that appreciate teamwork. With an environment supporting free interaction and encouraging people to share their opinions, the best ideas get developed further outside the meeting rooms.

For helping people to come together, the Metod range can be designed into clusters of two, four, six or more workstations. Metod's various additional elements also allow everyone to personalise their workstations according to what they need.

STRUCTURE OF A WORKSTATION

A good workstation is founded on stability. The light-looking Metod rests on a rigid steel frame that also holds all the additional elements: desk-mounted screens, small shelves, and handy storage spaces under the desks.

SIMPLICITY

There is nothing missing or excessive in Metod. With all the practical elements, you can create an unlimited number of combinations from traditional individual workstations to clusters the length of a hall.

FLEXIBILITY

Adding and removing elements keeps furniture flexible in time and space. Metod's strong frames guarantee that you can move your furniture between offices often.

SUSTAINABILITY

We have optimised our furniture to use materials wisely. For example, a cluster of four workstations needs ten fewer legs than four separate workstations.

10

ADDITIONAL ELEMENTS

The smarter the use of space, the better the work flow in the office. Metod's additional elements let you add noticeable versatility to your desk space. You can fix shelves to the felt screen in order to keep your documents perfectly organised and fix the board to the screen for leaving reminders.

Metod's additional elements look joyous and practical. Most importantly, all the elements are simple and modest, and let you focus on the most important thing: getting the work done.

INTEGRATED CABLE SYSTEM

Metod lets you to hide cables in a cable duct under the desk. The cables that are not moved every day are hidden in the duct, but you can still easily charge your mobile or laptop in the socket in the middle of the central panel.

MATERIALS

Metod is made of the best materials. Its modular steel frame is processed using environmentally friendly powder-coating technology and its desktops are covered with durable melamine. The central panel and the drawer fronts are made of strong MDF boards and finished with water-based paint. The system gets its softness and warmth from the screens covered in synthetic felt.

ELEMENTS

Work the way you like to work. When starting to design your own Metod set, first establish the suitable measurements for your workstation and then choose a drawer solution to go with it.

You can create unique combinations by choosing from different colours for the desk frame, finish for the desktop and colours for the central panel and drawer fronts.
