THULEMA

Thulema creates 21st century furniture for 21st century offices and public spaces. We follow and pay forward the high level of quality we have set for ourselves both when working with our clients and when making assembling and installing our furniture.

THOR

Thor is a classic that has been part of the Thulema product range for over 15 years. Over this time, the needs, options and ways of working at one's desk have remarkably changed.

Furniture must keep up with the times and Thor has managed to do that. With its durable and well thought-through design, and its strong structure and valuable materials, Thor has offered its users a smooth and elegant way to adjust to their new needs. As a solid and tested furniture, Thor proves time and again to be a beautiful and efficient solution for the working environment. Elaborate and dignified, Thor has become the favourite of hundreds of hard-working entrepreneurs in Estonia. They appreciate it for both its balanced nature and the values it represents.

BROAD SELECTION

The Thor range consists of workstations created for highly variable needs. Perfectly in line with the developments of technology that keep reducing the amount of office equipment and the need for paper, the new workstations have also become narrower and smaller in design. This means more room for the other things that support your work.

CREATED FOR WORK

The classic and minimalist Thor will always meet the expectations of both busy office bees and modern leaders for their elegantly laid-back furniture.

Despite its modest and somewhat strict appearance, Thor's carefully selected finishing materials allow you to create the right mood for either a serious space or a more light-hearted office.

FUNCTIONALITY

The Thor range lets you create versatile workspaces through various individual touches based on the different needs of the people and the space itself. You can create countless original and practical workstations by combining desks with side and customer tables, cabinets and drawers.

With the height adjustable desks, you can always choose a pleasant and comfortable working position.

10

CONSTRUCTION AND MATERIALS

The Thor range is based on a strong steel frame that stands the test of time and guarantees the impeccable look of your furniture even after several office moves. The available finishes range from natural warm wood, oak and maple veneer to monochromatic melamine in different colours.
