Disain:
Morten Nikolajsen

Multifunktsionaalne viisnurkne tumbade süsteem Manhattan Penta võimaldab lõputut arvu inspireerivaid kombinatsioone, mis kõik üksteisest veidi erinevad. Nii sobib ta ideaalselt mängulisse voolavasse ruumi või ka sellisesse ruumi, kuhu soovitakse mängulisust ja pehmust lisada. Manhattan Penta on kohandatav kõikjale avalikku ruumi, alates koolidest ja ootesaalidest ning lõpetades hubase kontoriga.

Disaineri juhtmõtteks on: "Loomke kauakestvaid tooteid ja jätame endast maha parema maailma kui see, kuhu me sündisime!" See on oluline mõte, mida iseenda, oma meeskonna või kogukonnaga koos arendada.
