

Noti.Mamu

Mamu is an exceptionally lightweight and compact armchair designed for homes and commercial spaces.

Tomek Rygalik's design draws inspiration from the technological breakthrough in furniture-making. The 3D geometry of this structural ergonomic seating solution has been achieved by using formed felt.

To further enhance user comfort, Mamu chairs are offered with an upholstered cushion and with a soft upholstered cover loosely enveloping the felt surface. The new Mamu version come up with fully upholstered seat and metal legs.
