Components

Componenti

Step 1

Before starting the assembly, make sure that the sixteen M8x18mm screws and the 4 M8x14mm screws can be found inside the holes of beams A and C.

Prima di iniziare il montaggio, assicurarsi della presenza delle 16 viti M8x18mm e delle 4 viti M8x14mm all'interno dei fori delle travi A e C.
Avant de commencer le montage, assurez-vous que les 16 vis M8x18mm et les 4 vis M8x14mm sont présentes dans les trous des poutres A et C.

Step 2

Remove the 4 M8X18mm screws from structure A and the 4 M8x18mm screws from structure C before securing the 2 elements B with the same screws.

Rimuovere le 4 viti M8X18mm della struttura A e le 4 viti M8x18mm della struttura C prima di fissare i 2 elementi B con le medesime viti.

Retirez les 4 vis M8X18mm de la structure A et les 4 vis M8x18mm de la structure C avant de fixer les 2 éléments B avec les mêmes vis.

true

Step 3

Remove the 4 M8x18mm screws from the beam of structure A and the 4 M8x18mm screws from structure C.

Rimuovere le 4 viti M8x18mm dalla trave della struttura A e le 4 viti M8x18mm dalla struttura C.
Retirez les 4 vis M8x18mm de la poutre de la structure A et les 4 vis M8x18mm de la structure C.

true

Step 4

Secure element G to structure A with the 4 M8x18mm screws and element D to structure C with the other, previously removed, 4 M8x18mm screws.

Fissare con le 4 viti M8x18mm l'elemento G alla struttura A e l'elemento D alla struttura C con le altre 4 viti M8x18mm precedentemente rimosse.
Fixez l'élément G à la structure A avec les 4 vis M8x18mm et l'élément D à la structure C avec les 4 autres vis M8x18mm retirées précédemment.

true

Step 5

Turn the structure upside down.

Capovolgere la struttura.
Retournez la structure.

svolgere in 3 persone
carry out in three people
à réaliser en trois personnes

true

Step 6

Remove the 2 M8x14mm screws from element G and the 4 M8x14mm screws from the beam of structure C.

Rimuovere le 2 viti M8x14mm dell'elemento G e le 4 viti M8x14mm dalla trave della struttura C.

Retirez les 2 vis M8x14mm de l'élément G et les 4 vis M8x14mm de la poutre de structure C.

Care and Maintenance

Do not drag along the top or grab it by the backrest and tables to relocate it to new positions. Always use two or more people to lift it off the floor and do not place it in the immediate vicinity of direct heat sources. Avoid sitting on the backrest and tables, and do not use them to rest your legs and feet. Pay attention to buckles, buttons or metal parts located on clothing and bags, because rubbing them against fabrics can, in the long term, lead to a gradual breakage of the fabric fibers. Remove dust weekly, using a Hoover. Be careful not to rub the brush against the fabric to avoid wearing out the fibers. As a general rule, it is advisable to act promptly on any type of stain, to prevent it from being absorbed by the fibers, using an absorbent cloth and a neutral detergent and first carrying out a small test on a hidden part of the fabric to test for any adverse reactions. When cleaning wood, only use a microfiber cloth dampened with lukewarm water and a neutral, non-abrasive, non-additive cleaning agent. In the case of minor scratches, apply beeswax.

Cura e Manutenzione

Non trascinare lungo il piano né di afferrarlo per lo schienale e i tavolini per ricollocarlo verso nuove posizioni. Servirsi sempre di due o più persone, sollevandolo da terra e non collocarlo nelle immediate vicinanze di fonti di calore dirette. Evitare di sedersi sopra lo schienale e i tavolini e non utilizzare quest'ultimi per appoggiare gambe e piedi. Si consiglia di prestare attenzione a fibbie, bottoni o parti metalliche situati sugli indumenti e sulle borse, in quanto, il loro sfregamento sui tessuti, nel lungo termine, possono dare origine a una graduale rottura delle fibre del tessuto. Eliminare la polvere settimanalmente, utilizzando un aspirapolvere. Prestate attenzione a non strofinare la spazzola sul tessuto per evitare di usurare le fibre. In linea generale si consiglia di agire tempestivamente su ogni tipo di macchia, per evitare che venga assorbita dalle fibre, utilizzando un panno assorbente e un detergente neutro ed effettuando dapprima una piccola prova su una parte di tessuto nascosto per testare eventuali reazioni avverse. Per la pulizia del legno, servirsi esclusivamente di un panno in microfibra inumidito con acqua tiepida e detergente neutro, non abrasivo e senza additivi. In caso di graffi lievi, passarvi sopra la cera d'api.

Entretien et Maintenance

Ne le traînez pas le long du plateau et ne le saisissez pas par le dossier et les tables pour le déplacer vers de nouvelles positions. Utilisez toujours deux personnes ou plus pour le soulever du sol et ne le placez pas à proximité immédiate de sources de chaleur directe. Évitez de vous asseoir sur le dossier et les tables, et ne les utilisez pas pour reposer vos jambes et vos pieds. Faites attention aux boucles, boutons ou pièces métalliques situés sur les vêtements et les sacs, car. Leur frottement sur les tissus peut, à long terme, entraîner une rupture progressive des fibres du tissu. Enlevez la poussière chaque semaine, à l'aide d'un aspirateur. Veillez à ne pas frotter la brosse contre le tissu pour éviter d'user les fibres. En règle générale, il est conseillé d'agir rapidement sur tout type de tache, pour éviter qu'elle ne soit absorbée par les fibres, en utilisant un chiffon absorbant et un détergent neutre et en effectuant d'abord un petit test sur une partie cachée du tissu pour vérifier les éventuelles réactions indésirables. Pour nettoyer le bois, utilisez uniquement un chiffon en microfibres humidifié avec de l'eau tiède et un produit de nettoyage neutre, non abrasif et non additif. En cas de petites rayures, appliquez de la cire d'abeille.
